CHRISTIAN
JOHN GONZALEZ

WEB DEVELOPER

Technical Skills

Strong: JavaScript, HTML5, CSS3, jQuery, API, AJAX, Bootstrap, responsive design, UI design, interaction design, wireframing, version control with GIT and GIThub, creative work w/Adobe Illustrator and Adobe Photoshop

Knowledgeable: Angular JS, FireBase, SQL, PHP, enterprise CMS management, A/B testing, SEO Optimization, WordPress, web performance analytics, data mining, waterfall, Agile

Web Applications Developed

Simple CMS using jQuery/AJAX
- Using web API's and AJAX, develop simple CMS functionality to enable a user to read, create and delete user input to a backend
- Manage user expectations with visual cues such as preloaders during AJAX execution and messaging based on request outcomes

Responsive JavaScript Calculator
- Demonstrate knowledge of JavaScript to solve logical and successive operations, basic calculations and irregular forms of user input
- Design responsive UI and enhance experience with visual cues that respond to interacting with the web application

Simple CMS using Angular JS
- Develop an interactive Angular application enabling users to read, create and delete user data from a shared data source
- Leverage API's, services, factories and controllers to modularly manage the $http service for database updates

NLF Scores and Game Schedule
- Collaborating with a small team, leverage web API's to build an application to easily access the NFL game schedule and scores
- Use AJAX to pull in data for NFL matchups, scores, weather, YouTube videos and Tweets to populate weekly game schedule

Starship Shooter HTML5 Video Game
- As a team, engineer an online web browser game and devise an ecommerce business model around game play
- Integrate payment API, Google Analytics, WordPress, Google SignIn and PHP backend to develop ecommerce functionality
- Design wireframes to conceive initial site design and to kickstart collaboration to identify project scope and game play goals
- Build out front end application logic and UI, incorporating music, sounds, and animations to aid user interaction

Professional

Experian Consumer Services | Senior Web Analyst   **2013 - 2016**
- Using SQL, develop metrics to monitor irregular customer behavior and delivery of services to customers
- Manage enterprise content management systems (CMS), creating and publishing site content. Also translate PSDs from creative team into cross browser compatible responsive web pages.

Experian Consumer Services | Web Analyst   **2013 - 2013**
- Working closely with the web operations manager and analytics team to confirm and troubleshoot reported web site errors or irregular customer behavior for Experian consumer facing domains.

Experian Consumer Services | Product Analyst   **2012 - 2013**
- Team up with product managers to understand project objectives and expectations. Translate and refactor objectives into business requirements, wireframes, and customer journeys to serve technical teams.

K&N Engineering | Technical Writer   **2007 - 2012**
- Create and design product installation manuals and supplemental material for K&N automotive products
- Collaborate with designers to develop ad concepts, print and digital marketing media for knfilters.com

Race Inspired Inc. | Entry Level Web Developer Internship   **2007**
- Utilize Google Adwords and Google Webmaster tools to optimize site content for organic search results (SEO)

Education

Learning Fuze   **Accelerated Web Development Program | 2016**

California State Polytechnic University | Pomona   **Major: E-Business | Minor: Marketing | 2007**

Related Courses: object oriented programming with java, database design and development w/MS SQL, interactive web development, system analysis and design, e-business application development w/PHP/MYSQL

Personal

When I'm not in front of a computer you can find me on my mountain bike or exploring the outdoors with my camera in hand. I also enjoy hiking and backpacking since I spent my youth exploring the outdoors as a Boy Scout, eventually achieving the rank of Eagle Scout.
